

# Measurement and Sizing

This Measurement Chart is a tool to help with ordering. Fill in all table areas with your child's measurement in inches.

- Use a soft measuring tape; keep the tape firm, but not tight.
- Find your child's measurements on the sizing chart for each item you need and select the corresponding size.
- Consider your child's growth history; we recommend you size up to account for future growth.

BODY AREA	# INCHES	NOTE
Neck = A		
Chest = B		Measure from under the armpits around fullest part of chest
Waist = C		Measure around narrowest part of waist
Hips = D		Measure around fullest part of hips
Inseam = E <i>(standard lengths apply)</i>		

BODY AREA	# INCHES	NOTE
Chest = A		Measure from under the armpits around fullest part of chest
Waist = B		Measure around narrowest part of waist
Hips = C		Measure around fullest part of hips
Inseam = D <i>(standard lengths apply)</i>		

**NOTE:** Each article of clothing is accompanied by a sizing chart that is unique to the article.

- Some items have specific sizing considerations. If this is the case, these considerations will be listed on the article's webpage.
- Some items may have sizing listed in either "full" or "half" sizing. (Example: a full chest measurement may be listed as 30". A half measurement would be 15").
- One item may have two image tiles representing options of "YOUTH" or "ADULT" sizing. Be sure to select the correct tile for the desired size range.
- **Always double-check your order for size, quantity and color accuracy.**
